

SUMMARY

- Results-driven professional with a Master's in Healthcare Informatics, leading 2-3 concurrent end-to-end clinical projects at Axis Clinicals across cross-functional teams, with a user first, problem-solving mindset focused on solving complex clinical and operational challenges by identifying workflow friction, understanding stakeholder needs, and driving data-informed execution and continuous improvement across clinical development programs

EDUCATION

Sacred Heart University, Fairfield | **Masters in Healthcare Informatics**

Connecticut | Sep '23 - Dec '24

GSL Dental College, Rajahmundry | **Bachelor of Dental sciences**

India | July '14 - Dec '19

PROFESSIONAL EXPERIENCE

Associate Project Manager | AXIS Clinicals

Dilworth, Minnesota | Mar '24 - Present

- Orchestrated cross functional execution across clinical, regulatory, and operational teams to deliver Phase 1 studies on time, driving protocol adherence, proactive risk mitigation, and end to end study execution for a ~\$100M drug development program from startup through completion.
- Independently owned end to end delivery of 4+ clinical trials, hit 100% of contract milestones across 20+ deliverables by identifying bottlenecks early and pivoting timelines in coordination with sponsors before deadlines were at risk
- Partnered with data scientists and clinical analysts to interrogate complex clinical datasets using statistical rigor, translating findings into actionable insights that reduced time to insight by ~30% and accelerated evidence based decision making across clinical development and program stakeholders.

PROJECTS

Purple Carrot - Product Strategy & [Prototype](#)

- Led a full product teardown identifying 7 critical friction points across acquisition, engagement, and retention funnels.
- Translated insights into scalable product interventions including persona-based meal personalization, visual first recipe UX, a gamified feedback to rewards loop, and a "Plant Seeds" loyalty system to improve repeat engagement and lifecycle value.
- Prototyped a working end to end experience in Replit to validate usability and demonstrate product vision in a live, interactive flow.

Dating App Safety Layer - [Prototype](#)

- Reframed safety as a core retention driver, positioning trust, not the match volume as the key constraint in user retention.
- Designed and prototyped a multi-layer safety system addressing critical user vulnerability moments: Getting to Know You Mode, First Meet Checklist, and Discomfort Detection System.
- Validated the hypothesis that increasing perceived psychological safety directly improves user retention, engagement, and conversion to real world interactions.

Thistle - Product Problem Solving & Tradeoff Analysis

- Identified "lack of satiety" as the dominant driver of negative reviews and mapped it to core user dissatisfaction patterns.
- Proposed a "Filling Score" mechanism to guide meal selection and improve perceived value, then independently stress tested the idea against business constraints.
- Surface level solution evolved into structured product reasoning by identifying key risks: revenue cannibalization and subjectivity bias in scoring systems, shifting from feature thinking to system level tradeoff evaluation.

Dental Surgeon | Akhil Multispeciality Dental Clinic

India | Feb '22 - Aug '23

- Examined **60+** oral X-rays weekly by effectively using EMR systems, applying data analysis to enable early detection and proactive intervention.
- Utilized patient oral health records and treatment outcomes data, to identify trends in recovery rates and optimize care strategies, achieving a 20% reduction in patient recovery time.

Dental Surgeon | Chagam Dental Care

India | Dec '19 - Feb '22

- Diagnosed and treated 50+ patients daily, developing strong Clinical expertise and pattern recognition skills in a high volume environment.
- Conducted qualitative analysis of 1,000+ patient feedback responses, identified retention and satisfaction trends that informed process redesign, an early application of user research and funnel analysis methodology

TECHNICAL SKILLS

Product Management: Product Strategy, User Research, Roadmap Planning, Agile, Sprint Planning, Scrum, A/B Testing

Analytics & Data: Google Analytics, Tableau, Power BI, Looker Studio, Mixpanel, Optimizely, MySQL, BigQuery

Project Management & Collaboration: Jira, Confluence, Trello, Smartsheet, Asana, MS Office

Healthcare & Compliance: EHR Systems | ICH-GCP | HIPAA | HITECH | CITI Certified
